

FIVE FACTS

to know about

- STIs -

1. Give your Valentine chocolate not an STI

One unprotected sexual act may potentially spread a sexually transmitted infection (STI).

2. Getting chocolate is sweet

So is knowing your STI status. Many STIs may present subtly or be asymptomatic but still spread.

3. Got an Itch you just can't scratch?

Walk in STI clinic is available Monday - Friday, 8 a.m. to noon at Specialty Clinics North - Infectious Disease Clinic.

4. Too Busy?

We can work with your schedule! Reach out so we can better understand how to meet your needs!

5. Sitting out of the fight?

STIs affect your health and readiness. We are here to screen, counsel, and get you back to doing what you do best.
